## EDUCATION

### University of São Paulo (USP) - ICMC

Feb 2026 – Dec 2029 (Expected)

Bachelor of Science in Information Systems

Sao Carlos, Brazil

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Computer Organization & Architecture, Databases, Software Engineering.

### Technical High School "Prof. Isaac Portal Roldán" (CTI - UNESP)

Completed Dec 2025

Technical Diploma in Computer Science Integrated with High School

Bauru, Brazil

- **Highlight:** PIBIC-Jr scientific research on STEAM methodology applied to waste management and automation with embedded hardware/software development.

## TECHNICAL SKILLS & LANGUAGES

- **Programming Languages:** C, Python, JavaScript, TypeScript, PHP, SQL, HTML5/CSS3, Java
- **Frameworks & Web:** React, Node.js, Laravel, RESTful APIs
- **Databases & Tools:** PostgreSQL, MySQL, Git/GitHub, Linux, Figma, Microsoft Office Suite
- **Areas of Interest:** Web & Backend Development, Mobile Applications, Automation
- **Languages:** Portuguese (Native), English (Intermediate), Spanish (Basic)
- **Certifications & Courses:** Database Modeling & Implementation (Bradesco Foundation), Introduction to Object-Oriented Programming (Bradesco Foundation)

## EXPERIENCE & UNIVERSITY EXTENSION

### USP CodeLab Sanca

Aug 2026 – Present

Software Development Member

Sao Carlos, Brazil

- Develop responsive and interactive web applications using JavaScript/TypeScript and React, adhering to componentization and clean code best practices.
- Apply software architecture patterns, data structures, and algorithmic problem-solving in active development sprints and technical workshops.
- Collaborate on team version control workflows utilizing Git and GitHub for continuous code integration.

### Token Project (IEEE Computer Society USP)

Apr 2026 – Present

Web Developer & Extension Volunteer

Sao Carlos, Brazil

- Support university outreach initiatives and technical presentations on Artificial Intelligence fundamentals and technology for local schools and community.
- Maintain and scale the official project website, implementing new features, bug fixes, and user interface enhancements focused on usability and responsiveness.

## FEATURED PROJECTS

### WiseBudget – Personal Finance Management (Capstone Project) | React, Laravel, PHP, RESTful APIs, MySQL Jan 2025 – Dec 2025

- Built a full-stack web application for personal financial tracking and budget organization as the final Capstone Project at CTI UNESP.
- Architected the backend service with Laravel, developing RESTful API endpoints for transaction management, budgeting categories, and user authentication.
- Created a responsive and intuitive React dashboard for real-time expense monitoring, data visualization, and financial planning.

### Bloom – E-commerce Web Platform | PHP, HTML5, CSS3, JavaScript, MySQL

Aug 2026 – Present

- Led the complete codebase and UI refactoring for an e-commerce platform in the cosmetics and beauty industry.
- Structured dynamic routing, client/server-side form validation, secure session authentication, and catalog/shopping cart management integrated with MySQL.
- Enhanced user experience (UX/UI) using semantic markup and responsive styling, prioritizing code maintainability, security, and fast page load times.
